## MODEL RS100 MODEL RS200

*Rust Resistant, Vandal Resistant Ceiling and Wall Luminaire  
108 Watts Maximum*

**Intertek**

Designed for wet or dry covered ceiling locations where efficiency, style, and endurance to environmental elements are as important as reducing installation time and cost. Rigid one-piece housing allows no flex during handling nor during installation.

**Quality engineered to resist rust, corrosion, moisture, dust, and impact.** Smooth lens exterior for ease of cleaning, rounded corners for added strength, and prismatic lens interior for optimal light diffusion. The totally nonconductive housing assures more safety to the end user. Special U-shaped channel with non-shifting poured-in-place gasket allows the flanged lens to fit snugly for a continuous seal against moisture and dust. Ideally suited for kitchens, food processing facilities, schools and universities, parking garages, government and civic facilities, car washes, commercial and industrial facilities, marine and public areas.

### Specifications

**Lens:** Vacuum-formed **polycarbonate**. Prismatic lens interior is engineered for maximum light control and diffusion; smooth exterior allows ease of cleaning; and rounded corners for additional strength. Edge is flanged to fit snugly into the gasketed retention channel for a continuous seal against moisture and dust.

**Housing:** Rigid one-piece compression-molded fiberglass reinforced polyester (self-extinguishing ASTM D635-74). Design and construction allows no flex during handling and installation, thus reduces the possibility for damage and decreases installation time and cost. Two 7/8" diameter end holes. White polyethylene molded end plugs snap lock in place to maintain tight seal of unused end holes.

**Gasket:** Continuous poured-in-place gasket completely fills the perimeter channel of the housing and snugly accepts lens flange for maximum seal integrity against moisture, dust and water washdown. Gasket cannot separate, shift or fall out, thus reducing installation time and cost.

**Mounting and Hardware:** Two corrosion resistant brass 10-32 fixture mounting studs, molded into the housing, accept strip lighting fixture internally. External mounting brackets optional.

**Lamps and Ballast:** 2-40PLL, 2-24-FLT5, 2-32-FLT8 and 2-54-FLT5. Electronic Ballast 0°F Start Temperature.

**Latching System:** Standard with Models 100 or 200, are 2 or 3 pairs (respectively) of white injection molded high impact Celcon suitcase style latches that secure a positive seal between housing, gasket and lens. Special tamperproof stainless steel (for marine use) or polycarbonate latches available as a custom component. W. F. Harris Lighting recommends using the optional stainless steel latches on any luminaire being used in outside applications.
